

October 10, 2018

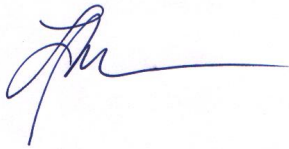

Dear Award Committee,

This is to confirm that Dr. Priscilla Kolibea Mante visited my lab as a visiting researcher, for a period of three months between June 01 and August 30, 2018. During this visit, Dr. Mante was able to complete 85% of her project on "Anticonvulsant Activity of Cryptolepine and its Solid-Lipid Nanoparticles in Management of Drug-Resistant Epilepsy".

Dr. Mante was provided with workspace and other work-related support as needed during the period.

ISN funds received were used to cater for her travel and housing expenses.

Sincerely,

Lori L. Isom, Ph.D.
